MESSAGE CENTER

Your electricity usage level for this billing period means that part of your electricity is in Block 2 (451-900 kilowatt hours), which costs about \$0.1342 per kWh used, including energy and other fees, but not including gross receipts taxes and franchise fees. The more electricity you use each month, the more it costs. Electricity in Block 1 (1-450 kWh) costs about \$0.1046 per kWh, plus gross receipts taxes and franchise fees. June through August, the cost in Block 2 is about \$0.1515. The cost for Block 1 does not change during the summer. The average PNM residential customer uses about 600 kWh per month. To see how many kWh you used for this billing period, see "Total kWh" in the "Your Current Electricity Charges" section on page two of your bill. For tips on how to reduce your energy usage, go to PNM.com/tips.

If you are planning a project that involves digging, including planting a tree or shrubs, make sure you know where your underground lines are. Always call New Mexico 811 Before You Dig. It's smart, safe, free and it's the law.

Since the weather is heating up, make sure your fan turns counter-clockwise. You might be surprised how many simple things you can do to cut your energy use. Add them up, and you'll get big energy savings.

If you enjoy flying kites, drones or model airplanes, only fly them in open areas, away from power poles, overhead power lines, substations, trees and other obstacles. For other safety tips while flying, check out Energy Works inside your bill!
